GAURAB MAJUMDAR
Vice President
Southeast Asia

Dear Member

The Global Electronics Association (Formerly known as IPC) is dedicated to advancing the worldwide electronics sector and supporting its members at every step. As part of our broader global engagement, we are placing increased focus on Southeast Asia, a region rapidly emerging as a hub for innovation and growth.

Countries such as Malaysia are driving significant momentum, with leading EMS and semiconductor companies scaling up investments and creating new opportunities for collaboration and advancement. In response, the Association is deepening its efforts through targeted education initiatives, regional standards development, semiconductor packaging technology forums, industry networking, and close partnerships with government stakeholders. To further support the industry, we have opened our **new office in Malaysia** and expanded our regional presence with two new team members, strengthening our on-ground capabilities.

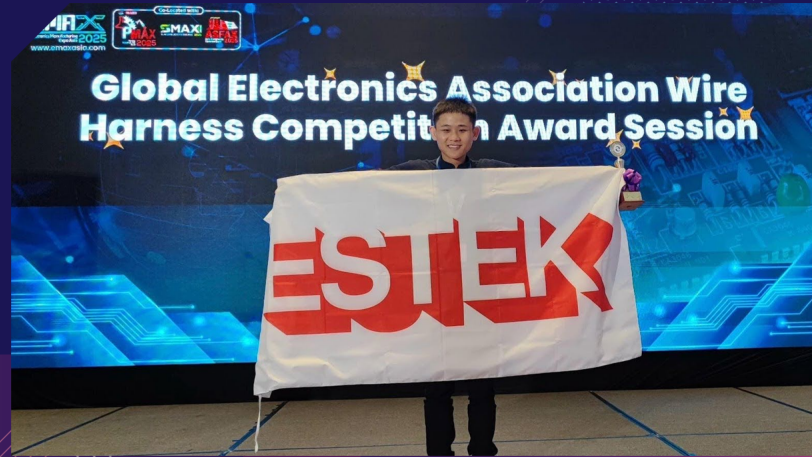

Through this newsletter, we aim to keep members informed and connected with the latest **industry news, upcoming events, sustainability initiatives, and training and certification programs**, empowering you to stay engaged with the region's vibrant electronics community.

PAST EVENTS

The **Global Electronics Association India, South East Asia** team visited Johor Bahru & **Melaka in Malaysia**, engaging with industry leaders and stakeholders to discuss our association Initiatives in Malaysia on **workforce development programs** and **semiconductor packaging technology solutions**.

Congratulations to **Ng Zhi Hao, from Estek Automation, winner of the Wire Harness Competition**, who will represent Malaysia at the Wire Harness World Championship Finals during IEMI 2026 in India.

We organized a **Technical Workshop on Advanced Electronic Packaging – Addressing Integration Challenges** on **November 12, 2025**, in **Penang, Malaysia**. The event united **200+ industry professionals**, creating a strong platform for collaboration and knowledge exchange.

We **hosted our first Standards Development Committee meeting in Malaysia**, bringing together leading **EMS, Wire Harness, and Semiconductor companies** for focused discussions on strengthening industry standards. This **marked an important step** toward advancing Malaysia's standards ecosystem, enhancing industry alignment, and supporting the nation's growing role in global electronics manufacturing.
