INDIA REGION **NEWSLETTER**

QUARTERLY EDITION

Volume: 77 | Issue: 78

July - September 2025

Dear Member,

The Global Electronics Association, established in 1957 in the USA, represents all facets of the electronics manufacturing industry with members from over 70 countries. Our India journey began in 2010, and today we are connected with around 800 Indian electronics companies. The Association is the leading source for industry standards, certification, skills training, global market insights, and networking opportunities for Indian, regional, and global members.

Our mission at Global Electronics Association has been to help the electronics industry to build electronics for a better world. We help SMEs, large & government organizations to achieve high-quality end product in the manufacturing process, maintain a competitive position and build capability in export market & supply chain.

As part of our ongoing commitment to support members in the region, "Events & Communication" Department of Global Electronics Association India Regional Office is constantly developing "Quarterly Edition" to share valuable information & knowledge. We request your feedback and inputs.

Thank you very much for your support.

GAURAB MAJUMDAR
Vice President
Southeast Asia, India & MEA

Robotic Soldering and Automation

Laser Soldering

Laser soldering enables soldering processes that have been abandoned for automation

As electronic circuit boards become thinner and electrical components more multilayered, technology is evolving so rapidly that conventional methods are no longer applicable.

Laser soldering makes it possible to solder ultra-fine areas that are difficult to reach with conventional soldering irons.

In-line specifications

Slider type off-line specifications

Integration

Our laser soldering system optimizes for a production line according to your requirements and provide comprehensive services from design to construction/adoption in compliance with international safety standards for lasers. Our expert engineers provides strong technical support (e.g., parameter settings) so that customers can save time and effort and focus on the comprehensive management of the production line. We can offer various ideas on the production line such as in-line, indexing, two slider, etc.

Past Events

July - September 2025

With the support of The Southern India Chamber of Commerce and Industry (SICCI), we hosted an industry networking & technical session on **Best Practices in Electronics Assembly & Wire Harness** in Chennai on July 30, 2025

We successfully hosted the **Hand Soldering Skill Challenge** at IPCA Electronics Expo India 2025, Bharat Mandapam, New Delhi from 21-23 August. Participants showcased their skills in precision, process knowledge, time management, and workmanship as per IPC-A-610 standards.
